

Edison Chen

Syosset, NY | ediedi520@gmail.com | (516) - 800 - 7491

EDUCATION

Syosset High School | GPA: 4.0

September 2021 - June 2025

Northeastern University, College of Engineering

Boston, MA

Bachelor of Science in Electrical Engineering | Minor: Computer Science

Expected May 2029

- Cumulative GPA: 4.0

- Relevant Coursework: Discrete Structures, Program Design and Implementation 1/2, Physics for Engineering 1, Physics for Engineering 2, General Chemistry for Engineering, Calculus 1/2

PROJECTS/EXPERIENCE

Arduino Prototyping - CTY Online Course

June 2021 - July 2021

- Participate in Zoom workshops on electronics basics, programming, and prototyping to build functional devices

InspirIT AI Scholars

June 2023 - Aug 2023

- Developed AI models to accurately predict exoplanet presence using astronomy data, focusing on machine learning techniques based on flux and luminosity data

- Reformatted raw astronomical data into processable metrics, differentiating exoplanets from non-exoplanets

Mousey the Junkbot

Sept 2024 - June 2025

- Built a light-seeking robot from salvaged computer parts, various sensors, and LEDs to mimic mouselike behavior

NASA L' SPACE MCA Electrical Engineer Programmatic Specialist

Jan 2026 - May 2026

- Worked in a multidisciplinary team to design a space mission concept and mission operations for a simulated NASA mission under mentorship from NASA scientists and engineers

- Developed skills as a programmatic to consider costs and schedule considerations for the electrical subsystem

LEADERSHIP

Programming/Electrical Head - Robotics High School Team

Sept 2022 - May 2025

- Programmed autonomous navigation with PathPlanner, integrated wiring for swerve modules, and installed LED indicators for competitions.

Student Liaison - Coding and Web Design

Sept 2023 - May 2025

- Taught weekly coding lessons (HTML, CSS, JavaScript, Python, Java) to 30+ students; secured resources and led club presentations

Vice President - Robotics Club and Engineering Club

Sept 2025 - Present

- Starting up the club to engage the community more in STEM by engaging with professionals, personalized projects, community outreach events and gain hands-on experience in STEM majors

SKILLS

Languages: Python, Java, HTML, CSS, C++

Frameworks & Tools/Libraries: Git, pandas, NumPym, scikit-learn, gradle,

Hardware/Software: AutoCAD, Vectorworks, Jupyter, Excel, MATLAB, NX Siemens

CERTIFICATIONS/AWARDS

Roslyn Code Overload Hackathon 2024 - 2nd Place

- Developed MadLib-inspired Android app; won Creativity Award among 40+ teams

PicoCTF CMU Cybersecurity Competition 2024 - Top 10% Nationwide

- Collaborated in a team of 5 to solve cybersecurity challenges using Linux and command-based tools in a two-week virtual cybersecurity high school level Capture The Flag

St. Joseph's University Hackathon - 10th Place

- Collaborated with a team of 3 to solve Java-based coding challenges

FRC Robotics Placements and Regional Awards - 13th place Hudson Valley Regional, Autonomous Award, 1st place FIRST Long Island Regional, 29th place Curie Division FRC Worlds

FTC Robotics Placements and Regional Awards - Motivate Award, Connect Award, Inspire Award 3rd Place, Design Award 2nd Place, 13th place FTC Long Island Championship
